***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-115 and 118-130, drawn to an apparatus or method for expanding a tubing, classified in class 166, subclass 380.
  - II. Claims 116-117, drawn to a method of expanding tubing downhole or a method of creating a fluid pressure actuating force in a bore, classified in class 166, subclass 381.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the steps of providing a column of relatively high density fluid to create hydrostatic pressure and/or utilizing the hydrostatic pressure to create an actuating force or to apply the hydrostatic pressure to bear on a selected portion of the tubing are not required by the combination claims (see evidence claims 1 and 58 for examples). The subcombination has separate utility such as actuating a downhole tool.
3. Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Art Unit: 3672

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
